

# JEIZEL SAVILLON

## Front-End & UI Engineer

React • Angular • TypeScript • JavaScript • UI/UX

### PROFILE

Computer Systems Engineer with experience building modern, responsive web applications using React, Angular, TypeScript, and JavaScript. Passionate about creating intuitive user experiences through clean code and thoughtful design.

### CONTACT

-  (504) 9534-9841
-  jeizeld.savillon@gmail.com
-  Siguatpeque, Honduras

### SKILLS

#### Front-End

- React
- Angular
- Flutter
- Vite
- TypeScript
- JavaScript
- HTML
- CSS
- Tailwind

#### Backend

- Node.js
- NestJS
- PostgreSQL
- REST APIs

#### Tools

- Git
- GitHub
- Postman
- VS Code

#### Design

- Figma
- Photoshop
- Illustrator

### WORK EXPERIENCE

#### MOBILE APPLICATION DEVELOPMENT INTERN

Alza tu voz April 2019 - June 2021

- Assisted in the development of mobile applications using Flutter.
- Participated in pilot testing and quality assurance before deployment.
- Supported the development and maintenance of mobile application features.

#### ENGINEER IN FRONT-END AND WEB DEVELOPMENT

Machmedia Technology October 2025 - Present

- Develop responsive web applications using React, JavaScript, and Vite.
- Build reusable UI components following modern Front-End best practices.
- Collaborate with designers and developers to deliver scalable and user-friendly solutions.
- Maintain and improve existing applications through bug fixes and feature enhancements.

#### ENGINEER IN FRONT-END AND WEB DEVELOPMENT, GRAPHIC DESIGN

TiviTrace S D RL Feb 2024 - October 2025

- Developed responsive web interfaces using Angular and Figma.
- Designed user-centered UI/UX experiences for web applications.
- Created logos, branding materials, marketing assets, and advertising campaigns using Adobe Photoshop and Adobe Illustrator.

# EDUCATION

---

BACHELOR'S DEGREE IN COMPUTER SYSTEMS ENGINEERING

Catholic University of Honduras (UNICAH)

2019 - 2024

## CAREER OBJECTIVE

Passionate Front-End Developer seeking opportunities to build scalable web applications, collaborate with multidisciplinary teams, and continue growing in modern web technologies while delivering exceptional user experiences.

# PROFESSIONAL SUMMARY

---

Throughout my career, I have participated in projects and technology initiatives that have strengthened both my technical expertise and my creative problem-solving skills.

One of the most significant experiences was participating in the Honduras Digital Challenge, one of the country's leading startup incubation and acceleration programs. Together with Héctor Sabillón and Alex Chinchilla, I contributed to the development of "Alza Tu Voz," a civic engagement mobile application designed to improve transparency and simplify public reporting for the municipality of Siguatepeque.

Our project was awarded Second Place in the Transparency Category, earning our team a scholarship to attend AbreLatam in Ecuador. There, we received specialized training in innovation, open government, technology, and the development of socially impactful digital solutions.

Beyond this achievement, I have worked on a variety of web development and graphic design projects, creating responsive websites, custom web templates, visual identities, branding, and logos for clients through my own design business.

I am committed to continuous learning and professional growth. To strengthen my technical skills, I have completed specialized training through Udemy, including:

- Flutter from Scratch – Mobile Application Development
- Front-End Development with React – Modern React application development

Today, I focus on building modern, scalable, and user-centered web applications while continuously expanding my knowledge of Front-End technologies, UI/UX design, and software development best practices.
